Mutare Software EVM Solution Now Rated “Avaya Compliant”

Unified Communications application is compatible with key Avaya IP Communications solutions

FOR IMMEDIATE RELEASE: Wednesday, January 24, 2008

Schaumburg, IL — Mutare Software today announced that its Enabled VoiceMail (EVM) application is compliant with key Internet Protocol (IP) telephony and solutions from Avaya, a leading global provider of business communications applications, systems and services.

EVM integrates with Avaya Communication Manager 5.0 IP telephony application and Avaya INTUITY™ AUDIX® 770 (IA770) messaging solution to add unified messaging capabilities to the desktop and mobile handheld devices by automatically copying voice and fax messages to the subscriber's email inbox.

“EVM delivers an hour a week of productivity savings to each user, and now those benefits can be realized by IA770 users,” says Mutare Software President, Ben Crown.

“We are delighted to earn the Avaya Compliant designation. It further affirms the value we place on our relationship with Avaya and our level of commitment to our mutual customers.”

Mutare Software is a member of the Avaya DevConnect program—an initiative to develop, market and sell innovative third-party products that interoperate with Avaya technology and extend the value of a company's investment in its network.

As a Platinum member of the program, Mutare Software is eligible to submit products for compatibility testing by the Avaya Solution Interoperability and Test Lab in Lincroft, N.J. There, a team of Avaya engineers develops a comprehensive test plan for each application to verify whether it is Avaya compliant. Doing so ensures that businesses are able to add best-in-class

capabilities to their network without having to replace their existing infrastructure—speeding deployment of new applications and reducing both network complexity and implementation costs.

“By offering compliance testing to the many innovative companies like Mutare Software who are members of our DevConnect program, Avaya promotes fully interoperable solutions that help businesses unleash powerful new possibilities,” said Eric Rossman, vice president, developer relations and technical alliances, Avaya. “They are able to use Intelligent Communications to connect employees and customers to information from wherever they are, over whatever device they have available – getting more out of their multivendor network and delivering new value to their bottom line.”

About Avaya

Avaya delivers Intelligent Communications solutions that help companies transform their businesses to achieve marketplace advantage. More than 1 million businesses worldwide, including more than 90 percent of the FORTUNE 500[®], use Avaya solutions for IP Telephony, Unified Communications, Contact Centers and Communications-Enabled Business Processes.
